## The Importance of Comfort in Care

A hospital is never the most comfortable spot for a small child or their concerned parents, but proper equipment such as cribs and beds can make the experience much more comfortable for all involved.

Esther Abigail is a 5 month old baby who came into Hospital Manuel de Jesus Subirana in Yoro, Honduras with a recurring cough. While receiving care she was able to rest easy in a new crib from Global Links, and her mother could rest easy knowing her baby was comfortable and safe.
