

"This means the world to us, so now we don't have to go all the way to McKees Rocks to use my sister's nebulizer!"

Helping Angelina get to School on Time

Angelina has asthma and her family was unable to get the nebulizer that she needs to breathe. Global Links worked with Pittsburgh Public School's Allegheny Traditional Academy nurses to provide her with a breathing machine.

"She and her mother were so excited to receive this nebulizer and supplies. And she has has a younger brother who will also benefit from them having all of this equipment in the home. This means that she will be able to get breathing treatments when she needs them and will greatly reduce the amount of school she misses!"
