Global Links Donated Gurney Still in Use with Pediatric Patients

On a visit in Nov. 2023, Executive Director Angela Garcia was able to meet with Dr. Ramón Villamil at the William Soler Pediatric University Hospital. He had been in Pittsburgh as part of the transplant team from Cuba that Global Links had hosted to learn alongside a team at Pittsburgh Children's Hospital. He shared, ***"It goes without saying how much we appreciate the enormous help and effort that you at Global Links make. I send you photos of this gurney that we brought from Pittsburgh more than a decade ago and that I use in my ultrasound consultation. I take great care of this gurney because in addition to the important function it performs, it is a symbol of friendship and collaboration between communities and good people."*** The photo above shows Dr. Villiami performing a cardiac ultrasound with the gurney from Global Links.
