## Improving Local Health with Community Partners

When the COVID-19 pandemic first began in March of 2020, it became more important than ever for neighbors to help neighbors. Global Links donated items such as personal protective equipment (PPE) and cleaning supplies to local non-profits so that they could continue to safely help others. In the right-hand photo, a doctor demonstrates how to use an at-home blood pressure monitor to a patient at Catholic Charities, a free clinic in Pittsburgh. Both are wearing face masks donated by Global Links. With the help of these face masks, medical providers at Catholic Charities could stay open and safe while continuing to give medical care to our neighbors in need.

On the left, two men at the Westmoreland County Blind Association wear a face shield and face mask from Global Links as they work in the paper shredding department. The Westmoreland County Blind Association works to improve the quality of life for sight impaired and intellectually challenged individuals. They could continue to safely provide services to their clients with supplies donated by Global Links.
