

Donation of Catheters Will Allow Surgeries to Happen Again!

In October 2024, Global Links led two delegations to mark the 30th anniversary of our humanitarian medical aid collaboration in Cuba and to hand deliver much needed surgical supplies to hospitals there. The two groups delivered 1,008 sutures (stitches) and 6,233 catheters of various types to the Calixto Garcia Hospital and the William Soler Pediatric Cardiocenter to help hundreds of patients.

Staff at Calixto Garcia Hospital were truly overjoyed, and shared with our Global Links staff that just that morning they had canceled a surgery for a patient in need because they did not have a urinary catheter to ease her blockage. **Now hundreds of surgeries like hers, which were postponed due to the lack of supplies, will be possible again!**
