We All Just Want Our Children to Be Healthy

In October 2024, Global Links led two delegations to mark the 30th anniversary of our humanitarian medical aid collaboration in Cuba and to hand deliver much needed supplies to hospitals there. The groups toured many primary care clinics located in the neighborhoods of Havana and what they saw time and time again were families getting childhood vaccinations for their babies, sometimes with Grandma there too!

Global Links has been able to provide syringes in bulk to help with the shortages of this critical supply that helps protect every child from preventable yet deadly diseases. Our Executive Director Angela Garcia shared her thoughts on how, *"We all want the same things for our children on this earth - for our children to grow up in dignity and with good health no matter which country they were born in, what language they speak, and what color their skin. It was a special moment for me to connect as one Mom to another Mom when speaking with some of the families."*
