

Rescued Supplies Help Heal Burn Patients, Thanks to St. Clair Health

In May 2025, our Executive Director hand-delivered specialized burn dressings to Calixto Garcia Hospital. **Thanks to our surplus recovery partnership with St. Clair Health, the burn dressings, instead of being discarded, were rescued by our team and redirected to where they were needed most.** The Cuban medical team overseas can now put these critically needed dressings to use caring for victims of fires and of battery acid burns, which the hospital staff are seeing more of as young people overcharge their scooters amidst the daily life reality of fuel shortages.
